TClarke

Our history and values

We believe in quality.

We believe in direct employment.

We believe in skills and training.

We believe in partnerships with our clients.

Since 1889, TClarke have been acknowledged as industry leaders and innovators; first in electrical contracting and now in full building services, including world class in-house mechanical and ICT.

Our people are highly motivated by the end goal of helping deliver world class healthcare service with our blue-chip partners.

Our Specialist Healthcare Services

- Specialist Engineering Team
- HTM compliant Mechanical & Electrical Services
- Full Turnkey Solutions
- P22 Supply Chain Member
- Designed for Life Supply Chain Member

Our Expertise

We're used to working in and around live healthcare environments across the UK. Our teams develop strong personal working relationships with staff, clinicians, estates departments and their counterparts in the hospital and contractor teams.

Alongside this, we also have an unrivalled level of specialist Healthcare M&E and manufacturing expertise which we bring to bear in providing innovative solutions in partnership with Siemens Healthcare.

Frameworks

TClarke Group is a Principal Supply Chain Member under the Procure 22 Framework and are now members of the NHS Designed for Life Framework: Building for Wales.

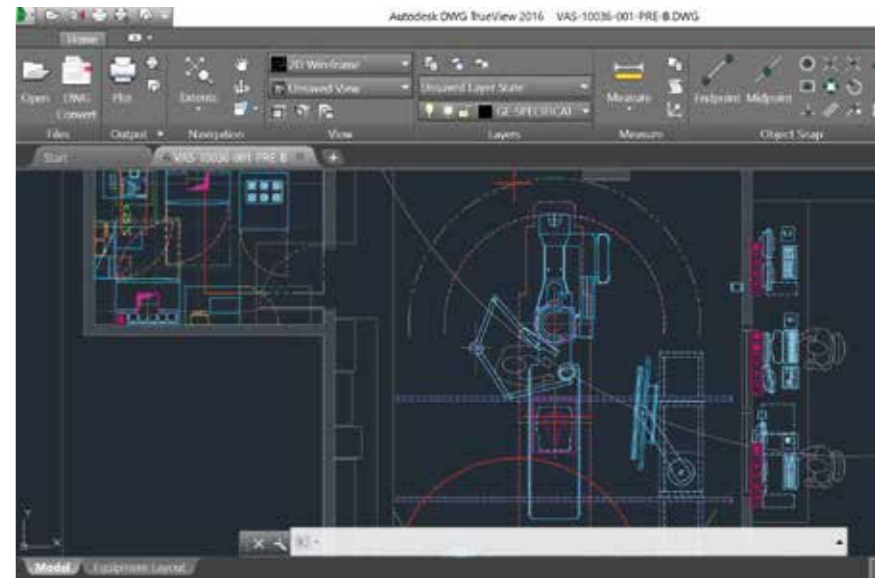

We have all the resource, experience and accreditations to deliver projects of any scale across the UK.

Complete Turnkey Solutions

TClarke are turnkey partners with GE and Siemens Healthcare and can provide the full design, procurement and installation service for healthcare environments ranging from wards and clinics to imaging suites. Once a construction project is complete we offer full in-house preventative and reactive FM services to maintain our installations.

Medical Panel Manufacturing

At our Stansted Manufacturing Facility we design and build control panels of consistently high quality for world class manufacturing partners.

Our expertise spans the latest technical and regulatory requirements, manufacturer requirements and the practical demands of healthcare engineering. We're very proud to be recognised as a market leader, both for the quality of our products and the innovative thinking they display.

Great Clients: Deep Relationships

“What we value most about TClarke is the fact that they understand what engineering in a live hospital environment demands. Our trust has grown over the years that we’ve worked together.”
